

U.S. Fish & Wildlife Service

Idaho Endangered, Threatened, Proposed and Candidate Species by County

This county species list is for informational purposes only.
U.S. Fish and Wildlife Service biologists have used the best scientific
and biological information available to formulate this list.
This list is updated quarterly.

Section 7 of the Act requires Federal agencies to assure that their actions are not likely to jeopardize the continued existence of endangered or threatened species. Federal funding, permitting, or land management decisions are considered to be Federal actions subject to Section 7. If the proposed action may affect a listed species, consultation with the Service is required. Formal consultation must be initiated for any project that is likely to adversely affect a threatened or endangered species. If a proposed species is likely to be jeopardized by a Federal action, regulations require a conference between the Federal agency and the Service.

To obtain a species list for a Federally-funded project, please contact the Snake River Basin Office in Boise, Idaho, at (208) 378-5243.

KEY TO ABBREVIATIONS

LE - Listed endangered
LT - Listed threatened
XN - Experimental/non-essential population
PT - Proposed threatened
C - Candidate
